

## Comprehension of Content and/or Concepts

CO-TEACH  
PLAY # 73

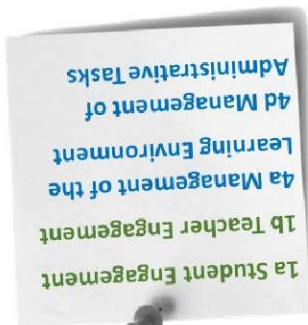

Partner A informs students that they will have to continue their group project later and directs them to put materials away. As Partner A monitors the clean-up procedure, Partner B conferences with a few selected students. Students discuss their group's product, identify their contributions, as Partner B assesses their comprehension.

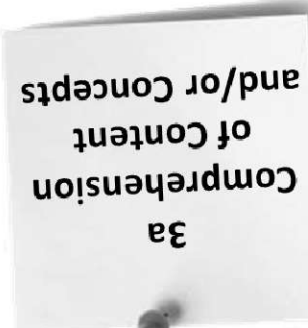

ACTION: Perform comprehension checks for selected students.

Some coordination and/or advanced planning may be required.
