

Management of Administrative Tasks

CO-TEACH
PLAY # 115

After circulating and monitoring students during individual seatwork, partners conduct a brief private conference to discuss and document student performance. Following the discussion, one partner continues monitoring and assisting those students who are still working. The other partner uses the alternate co-teaching model to provide enrichment to the group of students who have successfully completed the task.

ACTION: Use ongoing assessment information to guide instruction.

Some coordination and/or advanced planning required.
